The roads included in this component have a total length of 644.35 km. The APC adds technically required and economically justified segment-specific works like rehabilitation (RH), traditional backlog maintenance (BM), preventive maintenance (PM), and routine maintenance (RM).</p> <p>Preventive Maintenance (PM) Component outside LTPBME</p> <p>The PM component includes asphalt overlaying on existing paved roads, selective concrete re-blocking, and other maintenance works to be done before defects on the roads occur. PM is usually done once every five (5) years unless otherwise determined by the Highway Design and Management version 4 (HDM-4) analysis. The PM for this project covers 592.50 km of National Arterial Roads outside the APC component wherein a minimum length of 15 km per package is set. Although the thickness of overlays may differ, each contract package will be provided with a homogenous riding surface.</p>	Interregional	I, III, IV-A, IV-B, V, XI, XIII	10

Development of Irrigation System in the Philippine Sugarcane Areas	DA - SRA	Water is an essential input in all agricultural crops and enough moisture is necessary for nutrient absorption of sugarcane crop. Severe moisture losses during the early development of sugarcane plant reduces yield by 30%, so in order to attain the optimum productivity level of sugarcane areas irrigation facilities should be provided, especially to the marginal farmers who cannot afford to purchase irrigation facilities. Irrigation systems installed in the country's sugarcane farms are mostly procured through private sector initiatives. The installation of small water impounding areas and shallow tube wells in sugarcane milling districts to increase the number of irrigated sugarcane farms will be worked out by SRA with the Bureau of Soils and Water Management (DA-BSWM) through the support of DA as mother agency.	Interregional	Sugarcane areas established by SRA	10	7	Improved food security  Growth in agriculture and fishery sector increased  Incomes in agriculture and fishery sector increased	
Dibulan Irrigation Project	DA - NIA	The project aims to provide adequate irrigation water supply to about 2,080 hectares of agricultural lands in order to increase crop production in the area thereby uplifting the socio-economic life of the intended beneficiaries in the municipalities of Jones and San Agustin, province of Isabela.	Region-Specific	II	10	2, 7, 16	Increase in irrigation development (designed service area completed over total potential irrigable area)	
Dinapigue SSIP	DA - NIA	Construction of facilities to provide irrigation service in Dinapigue, Isabela.	Region-Specific	II	10	2, 7, 16	Increase in irrigation development (designed service area completed over total potential irrigable area)	
Dipalo RIS Extension Project	DA - NIA	Improvement of the existing irrigation system, construction of additional canal and structures to generate additional area, & provision of flood mitigating and other environment protection structures and climate change adaptation measures.	Region-Specific	I	10	2, 7, 16	Increase in irrigation development (designed service area completed over total potential irrigable area)

Region-Specific	CAR	10	2, 7, 16	Increase in irrigation development (designed service area completed over total potential irrigable area)	
National Organic Agriculture Program (NOAP)	DA	NOAP serves as the first direction in the implementation of the Organic Agriculture Act of 2010 Republic Act 10068. The Organic Agriculture Act of 2010 aims to promote, propagate, develop further and implement the practice of organic agriculture in the Philippines that will cumulatively condition and enrich the fertility of the soil, increase farm productivity, reduce pollution and destruction of the environment, prevent the depletion of natural resources, further protect the health of farmers, consumers and the general public, and save on imported farm inputs. Towards this end, a comprehensive program for the promotion of community-based organic fertilizers such as compost, pesticides and other farm inputs, together with a nationwide educational and promotional campaign for the use and processing, as well as the adoption of organic agricultural system as a viable alternative shall be undertaken. Ultimately, it supports the central role of the farmers, indigenous people and other stakeholders at the grassroots of the program.	Nationwide		10	16	increase in yield or volume of production	
2nd Cordillera Highland Agricultural Resource Management Project	DA - OSEC	The project aims to increase farm family income of the rural poor through sustainable agricultural development; and enhance the quality of life of the rural poor by improving land tenure security, food security and watershed conservation.	Region-Specific	CAR	10	2, 7, 16	increase in yield and volume of production	
Adapting to Climate Change Impact Through the Construction of Water Impounding Facilities in the Phils. (PASA SRIP)	DA - NIA	Construction of a zoned earthfill dam with a height of 34 m and a reservoir area of 34.2 ha for irrigation flood control and aquaculture.	Region-Specific	II	10	2, 7, 16	Increase in irrigation development (designed service area completed over total potential irrigable area)	
Agno River Integrated Irrigation Project	DA - NIA	The project envisioned to provide year round irrigation water supply to some 39,744 ha of farmland to benefit about 28,207 farm families in the Province of Pangasinan.	Region-Specific	I	10	2, 7, 16	Increase in irrigation development (designed service area completed over total potential irrigable area)

Program/ Project Title	Agency Name	Program/Project Description	Spatial Coverage		PDP Chapter	16 Point Agenda Addressed	PDP Results Matrices (RM) Critical Indicators Addressed	Expected Date of Presentation to the ICC
			Nationwide/ Interregional/ Region-Specific	Region				
(A)	(B)	(C)	(D)	(E)	(F)	(G)	(H)	(I)
Agri-Pinoy Corn Program	DA	The program aims to achieve self-sufficiency in feed crops (yellow corn and cassava) to sustain the growing demand of the livestock and poultry sub-sectors and help stabilize prices in our local market. It also aims to ensure steady supply of white corn grains and expand the market for high quality white corn grits to help ease the pressure on rice demand. The Corn Program assures coordination with the LGUs in implementing its various programs/projects/activities in support to the corn farmers. Good agricultural practices in corn production are formally introduced to farmers through trainings in order to maintain healthy working environment. Natural resource conservation is also encouraged through the adoption of proper corn planting technologies.	Nationwide		10	2, 7, 16	increase in yield or volume of production; increase in net profit:cost ratio	
Balikatan Sagip Patubig Program	DA - NIA	Rehabilitation program designed to bring back idle and non-functioning CIS into operation & provide irrigation to new areas. Program promotes participation among national government - DA/NIA, LGU, IA's.	Interregional	II, III, V, VII	10	2, 7, 16	Increase in irrigation development (designed service area completed over total potential irrigable area)	
Bongabong River River Irrigation Project	DA - NIA	Construction of concrete corewall diversion, canal networks, drainage facilities and service roads.	Region-Specific	IV-B	10	2, 7, 16	Increase in irrigation development (designed service area completed over total potential irrigable area)	
Bulo River Irrigation Project	DA - NIA	The project involves the rehabilitation of Bulo Dam.	Region-Specific	III	10	2, 7, 16	Increase in irrigation development (designed service area completed over total potential irrigable area)	
Casencan Multipurpose Irrigation Project- Irrigation Component, Phase II	DA - NIA	The project aims to maximize the water utilization and economic benefit of the water delivered by the Casencan BOT Project and to optimize the utilization of the constructed Super Diversion Canal and new area intake structure under CMIPP Phase I.	Region-Specific	III	10	2, 7, 16	Increase in irrigation development (designed service area completed over total potential irrigable area)	
Hibulungan SRIP	DA - NIA	Construction of a zoned earthfill dam 26 m high with crest length of 240 m, reservoir area of 149 hectares.	Region-Specific	VIII	10	2, 7, 16	Increase in irrigation development (designed service area completed over total potential irrigable area)	
High Value Crops Development Program (HVCDP) - Irrigation Component	DA	HVCDP is in line with the Republic Act 7900 (High Value Crops Development Act of 1995). This is an act to promote the production, processing, marketing and distribution of high value crops. HVCDP is a priority program of the Department of Agriculture created to help address food security, poverty alleviation and sustainable growth through increased farm income and productivity. The target service areas include convergence areas, strategic production zones and farm households. These areas need the interventions from the government in terms of production, extension, processing, marketing and regulatory support. The program is implemented yearly with a coverage of implementation down to barangay levels.	Nationwide		10	2, 7, 16	increase in yield and volume of production; increase in net profit:cost ratio

Ibingan SRIP	DA - NIA	Construction of reservoir dam and irrigation facilities.	Region-Specific	V	10	2, 7, 16	Increase in irrigation development (designed service area completed over total potential irrigable area)	
Irrigated Rice Production Enhancement Project	DA - NIA	Subproject of the Rapid Food Production Enhancement Programme which aims to reduce poverty & improve quality of life of farming households in selected provinces under the Rice Self-Sufficiency Plan. NIA components are: strengthening of IA's and rural infrastructure improvement.	Interregional	VI, VIII, X	10	2, 7, 16	Increase in irrigation development (designed service area completed over total potential irrigable area)	
Jalaur River Multipurpose Project, Stage II	DA - NIA	The project aims to provide year round irrigation water supply to some 31,840 ha of agricultural land that includes 9,500 ha of new area and rehabilitation of 22,340 ha covered by five (5) existing irrigation systems. The project will construct hydro-power electric plant that can generate 6.6. MW of electricity. Also, the project will supplement the supply of water for domestic and industrial use.	Region-Specific	VI	10	2, 7, 16	Increase in irrigation development (designed service area completed over total potential irrigable area)	
Malitubog-Maridagao- 2 Irrigation Project	DA - NIA	The project involves the rehabilitation and improvement of Maridagao service area by construction of irrigation and drainage canals, canal structures, service and intra site roads, building facilities and other appurtenant structures.	Interregional	XII, ARMM	10	2, 7, 16	Increase in irrigation development (designed service area completed over total potential irrigable area)

National Irrigation Sector Rehabilitation and Improvement Project	DA - NIA	The project aims to improve existing irrigation systems (32 NISs) for sustainable functionality. The project will rehabilitate 35,670 ha.	Interregional	I, II, III, IV-A, VI, X, XI, XII, XIII	10	2, 7, 16	Increase in irrigation development (designed service area completed over total potential irrigable area)	
NIS/CIS Extension Project	DA - NIA	To developed extension new service area for the existing NIS/CIS. The project involves the construction of dams, canal and canal structures, drainage structures and farm and project facilities.	Nationwide		10	2, 7, 16	Increase in irrigation development (designed service area completed over total potential irrigable area)	
Participatory Irrigation Development Project	DA - NIA	The project seeks to improve NIA's financial viability thru institutional reform & capacity building including better service delivery to farmers; enhance farmers participation & their capacity to manage NIS transferred from NIA to IAs & further narrow the gap between service areas & actual irrigated areas. Components: 1) phased streamlining / rationalization plan of NIA; 2) improvement / rehabilitation & modernization of NIS, implementation of irrigation management transfer & establishment of an M & E system; 3) sustainable development of communal irrigation systems; 4) enhance NIA financial & technical capacity.	Nationwide		10	2, 7, 16	Increase in irrigation development (designed service area completed over total potential irrigable area)	
Payment for Right of Way, Completion Works, Unpaid Claims of Completed Projects	DA - NIA	This is a subsidy for the payment of right of way, completion works of ongoing projects and unpaid claims of completed project.	Nationwide		10	2, 7, 16	Increase in irrigation development (designed service area completed over total potential irrigable area)

Implementation and Monitoring of Payapa at Masaganang PamayanAn (PAMANA)	DA - OSEC	PAMANA (PAYapa at MASaganang PamayaNAn) is the national government's program and framework for peace and development. It is implemented in areas affected by conflict and communities covered by existing peace agreements. A complementary track to peace negotiations, the Program's main strategy is to bring back government to PAMANA Areas, ensuring that the communities benefit from improved delivery of basic social services and are served by responsive, transparent and accountable government units. For the period of 2011-2016, PAMANA will be implemented in 48 provinces where each area will receive development programs according to the specific needs of the people residing in that region.	Interregional	CAR, IV-A, IV-B, V, VI, VII, VIII, IX, X, XI, XII, ARMM, Central Office	10		increase in yield or volume of production	
Implementation of Various Programs/Projects of Local Governments: Bottom-Up Budgeting (BUB)	DA - OSEC	The bottom-up budgeting process would mean focusing on 300 to 400 of the poorest municipalities identified by the Cabinet's Human Development and Poverty Reduction (HDPR) cluster. Local-level engagement will be facilitated via relevant government agencies, local community leaders, LGUs, and partner civic organizations.	Nationwide		10		increase in yield or volume of production	
Rapid Food Production Enhancement Programme (RaFPEP)	DA - OSEC NIA	RaFPEP aims to help increase food production by farmers on rainfed and lowland irrigated rice areas on a sustainable basis to ensure family food security of smallholder farm families, thus contributing to rural poverty reduction. The program provides production inputs, extension and support services to marginal farmers, and rehabilitate/restore communal irrigation systems in selected provinces, which are done in collaboration and cooperation of different partner-implementing agencies with the same endeavor.	Interregional	VIII, X	10	2, 7, 16	increase in yield and volume of production	
Ambayon RIS Ext'n Project	DA - NIA	The projects aims to provide adequate irrigation water supply by restoring 50 hectares and rehabilitating 150 hectares of agricultural lands in order to increase crop production in the area thereby uplifting the socio-economic life of intended beneficiaries	Region-Specific	I	10	2, 7, 16	Increase in irrigation development (designed service area completed over total potential irrigable area)	
Saug River Multi-Purpose Project Phase 1	DA - NIA	construction of irrigation facilities such as dam, concrete-lined canals, service roads, and other appurtenances	Region-Specific	XI	10			
Panas Small Reservoir Irrigation Project (SRIP)	DA - NIA	small river impounding project	Region-Specific	XI	10

<i>Water Supply</i>								
KfW III (Prov. Towns Water Supply and Sanitation Program III)	LWUA	Drilling of deepwells, construction of reservoirs, laying of pipes, installation of water treatment plants	Interregional	I, II, III, IV, V, VI, IX	10			
Construction, Development, Rehabilitation, Expansion of 1,615 Water Supply Projects	LWUA	Construction, Development, Rehabilitation, Expansion of 1,615 Water Supply Projects in 801 WDs from 2013-2016	Nationwide	Nationwide	10			
Angat Water and Utilization and Aqueduct Improvement Project (AWUAIP), Phase 2	DPWH - MWSS	The project ensures the conveyance of raw water from the Angat Dam to La Mesa Dam all the way to the water treatment plants in La Mesa and Balara by rehabilitating and repairing the leaking Aqueduct No. 5. Also, it involves construction of a 9.90 km aqueduct/tunnel, rehabilitation of existing aqueduct no. 5 and interconnection works	Interregional	NCR, III	10			
Sumag River Diversion Dam Project.	DPWH - MWSS	Water from Sumag River in General Nakar, Quezon will be diverted to Umiray Tunnel to augment water supply in the Angat Dam	Interregional	NCR, IV-A	10			
Angat-Umiray Transbasin Tunnel Rehabilitation Project	DPWH - MWSS	The project intends to rehabilitate facilities/structures damaged by typhoon to ensure the delivery of 780 MLD of raw water equivalent to 30% of Angat Dam's total water supply of 4,000 MLD	Interregional	NCR, III, IV-A	10			
Water Catchment Basin Project	DPWH - MWSS	To provide additional catchment area for Angat dam spillage in order to increase the operational level of Angat Dam and reduce the risk of flooding downstream, and among the potential project for this is the construction of Ipo Dam #2.	Interregional	NCR, III	10			
Balara Water HUB	DPWH - MWSS	MWSS' envision to develop its 76 hectares property located in Balara, Quezon City, into a water hub showcasing green technology and a learning center for water resource development, use and conservation.	Region-Specific	NCR	10			
MDG-F 1919 Enhancing Access to and Provision of Water Services with the Active Participation of the Poor	DILG	This is a Joint Programme (JP) of NEDA and DILG focused to 36 waterless municipalities to improve the quality of water services provided by water utilities at the local/community level and enhance their local capacities to develop, operate and manage water utilities	Interregional	I, II, III, IV, V, VI, VII, VIII, IX, X, XI, XII, XIII	10	Agenda 8	MDG Target: Increase the proportion of population with access to potable water (levels I and II) AND; Eliminate the number of waterless areas	
Enhanced Access to Water Services by the Poor Through Participatory Water Governance	DILG	This Scaling-up Project focus to the 10 Municipalities in Regions 10 and 11 to improve the quality of water services provided by water utilities at the local/community level and enhance their local capacities to develop, operate and manage water utilities and increase awareness on water governance	Interregional	X, XI	10	Agenda 8		
Provision for Potable Water Supply (Sagana at Ligtas na Tubig sa Lahat Program and Bottom-Up Budgeting)	DILG	The project aims to contribute to the attainment of the goal of providing potable water to entire country. It is designed to provide water supply systems to waterless municipalities, barangays with high poverty incidence, in resettlement sites without water access, and in areas that have existing health centers without water supply systems. It will, likewise, enhance/improve local capacities of LGUs/water service providers in planning, implementation operation and management of water supply facilities in sustainable manner.	Interregional	I, II, III, IV-A, IV-B, V, VI, VII, VIII, IX, X, XI, XII, XIII, CAR, ARMM	10 & 7	Agenda 2, 8	MDG Target: Increase the proportion of population with access to potable water (levels I and II) AND; Eliminate the number of waterless areas

<i>Flood Control</i>								
Pasig-Marikina River Channel Improvement Project, Phase III PH-P252	DPWH	The project involves dredging, excavation, provision of new parapet wall and embankment along selected critical sections of the Lower Marikina River, including the additional potential works (9.90 km in total) from the ongoing PMRCIP Phase 2 which are not included in the original scope.	Region-Specific	NCR	10		Reduced vulnerability to flooding	
Flood Risk Management Project (FRIMP) along principal rivers, PH-P253 [Cagayan River (Region II), Tagoloan River (Region X), Imus River (Region IV-A)]	DPWH	The project involves the following: a. Construction of erosion and protection revetment works to address issues of the bank erosion in Cagayan River and protect the life of residential people; b. Construction of dike system in lower Tagoloan River Basin to protect the areas under the incomplete flood protection system; c. Construction of two (2) retarding basins in Imus River Basin to mitigate the services flood overflow and the extensive flood inundation along the lower stretches of tributaries.	Interregional	II, IV-A, X	10			
Flood Risk Management Project for Cagayan de Oro River (FRIMP-CDOR)	DPWH	The project aims to mitigate flood risk in Cagayan de Oro River Basin through the construction of flood protection measures and implementation of non-structural measures. The project works include construction of new dike, revetments and improvement of existing bridge in the Cagayan de Oro River stretch between the Macajalar Bay and the Pelaez Bridge with the total length of 11.6 km.	Region-Specific	X	10
